HED, Inc. Announces Preferred Partnership with Accilator in the EU and Nordic Regions
In efforts to continue growing globally, HED, Inc. expands its distribution and system integration presence into Europe and Sweden

Hartford, WI – HED, Inc. (Hydro Electronic Devices) a leading designer and manufacturer of vehicle controls, HMI and telematics for mobile equipment announced their distribution and system integration partnership with Accilator Technologies in Stockholm, Sweden.

Accilator offers electronic and electro-mechanic solutions consisting of advanced technical components. The company's product mix includes both customized and more standardized parts from carefully selected niche suppliers of sensors & switches, power electronics, HMI and electronics for vehicles. As a system integrator, Accilator also provides added value offering key support and application development expertise directly to customers within their region.

Similar to HED, Accilator's design phase and production is supported by and follows ISO 9001 and IATF 16949 to meet demand for high-quality expectations.

"We are very excited to partner with Accilator. They are a high talent organization capable of providing our customers with unprecedented vehicle control system solutions." said Steve Magee, VP of Sales and Marketing at HED, Inc. "Accilator has the right team and expertise to support our International growth strategy to seek partners capable of full system integration."

"We are also very excited to partner with HED. By adding their product portfolio, Accilator will have a complete package for the market." Said Rikard Rockhammar, COB at Accilator Technologies.
